

**Designation**                      **Maintenance Technician (m/f) 100%**

**Work place**                      Niederhasli, Switzerland (30 minutes from Zürich city)

**About Flisom**

FLISOM is a dynamic high-tech company in the field of solar energy, specializing in next generation of thin-film flexible solar modules with exciting opportunities. The company has made remarkable progress in developing the production technologies for low cost and high performance solar modules and is now expanding to increase production volume.

FLISOM, with a team of 75 employees, offers attractive conditions in a strongly developing market worldwide.

For our maintenance team, we are looking for a dedicated, flexible **maintenance technician**, able to perform highly diversified duties to install, troubleshoot, repair and maintain production equipment and factory utilities according to the internal safety and maintenance procedures, in order to support the achievement of the factory uptime.

**Responsibilities**

After an on-site training, you will be asked to fulfill the following tasks:

- Execute the daily, weekly, monthly, quarterly, semi-annual and annual routine preventive maintenance schedule
- In the event of a mechanical or electrical failure, troubleshoot the equipment and its components with the appropriate auxiliary equipment. Execute the relative repair and/or parts replacement to recover the equipment correct performance and let it be available for production
- Contribute to the installation of any equipment hardware upgrade or facility.
- Keep meticulous records of production equipment service history in order to use it to diagnose and address future issues
- Contribute to maintain inventory of spare parts
- Learn the basic operating procedure in the plant in order to operate independently in case of a malfunction

**Education, Experience, and desired traits**

- High school diploma; completed technical apprenticeship
- Knowledge and understanding of mechanics, pneumatics, hydraulic, electrics and related schematics reading. Ability to read equipment manuals, P&ID diagrams and maintenance procedures
- Knowledge of general maintenance processes and methods, especially focused on troubleshooting activity
- Safe handling and cleanliness of work-tools and hand-held electrical devices.

**Other desired traits**

- Experience in solar panel manufacturing equipment maintenance preferred
- Proven experience as maintenance technician or other maintenance related job
- Ability to work with minimal supervision, prioritize tasks and follow specified procedures
- A problem solver, and a person who would get his/her hands dirty
- Compliance with the safety regulations and attitude to keep a clean and a tidy working area
- Willingness to work in shifts / weekends based on requirement
- Experience in working in clean room area
